## Career Objective

To leverage my technical expertise, passion for problem-solving, and commitment to delivering high-quality software solutions in a challenging and dynamic environment. Seeking a software engineering role that fosters innovation, encourages professional growth, and allows me to contribute to impactful projects that make a difference.

## Projects/Technical Skills

**PWA weather app Using ReactJS and Open Weather API**: Developed a weather application using Progressive Web App (PWA) technology. Implemented the frontend using ReactJS, CSS, and HTML. Built the backend using NodeJS. The application displays real-time weather information based on user location and provides additional features such as hourly and weekly forecasts.

**Network Administration**: Acquired skills in network administration, including configuring and managing network devices, implementing security measures, troubleshooting network issues, and optimizing network performance.

**Timesheet management**: I was providing and handling mail part where i have to manage the employees timesheet and worked on dotNet to generate a auto mail and send to those employee who have not completed their minimum requirement hours for the week.

**Apna Car - Online Car Rental Booking**: Developed using PHP, MySQL, HTML, and CSS, "Apna Car" is an online car rental booking system. It offers a user-friendly interface for customers to browse, select, and reserve rental cars based on their preferences. The system includes user registration, a comprehensive car catalog, search by location and vehicle type, and secure booking with payment processing. PHP manages user authentication, sessions, and dynamic content.

**Trading Web Application**: Working as a freelancer on a trading web application. Responsible for developing the frontend using ReactJS, HTML, and CSS. Integrating the frontend with the backend, which is built using NodeJS. Utilizing ES7 features for efficient and clean coding. Collaborating with the client to implement their requirements and deliver a user-friendly trading platform.
